

Complimentary Webinar presented by NPL: Clinically Speaking: Group 2 vs. Group 3 Power Wheelchairs (1hr)

**Class size is limited
to 75. Register early.**

Course Description: This course is intended for Licensed/Certified Medical Professionals (i.e. PT, OT, Physician, Nurse), Rehab Professionals (ATP, SMS, CRTS) and Reimbursement & Billing Specialists.

This course will help clinicians and supplier ATPs understand the nuances of how power wheelchairs work in order to justify the base recommended for their client. We will review the minimum performance characteristics of each power wheelchair group; consider single vs. multiple power capabilities and limitations; emphasize what a non-expandable and an expandable electronics system is and does, and examine the need to operate power seat functions and their operation through the drive input device.

Learning Objectives:

At the conclusion of the course the participant will be able to:

- Identify 5 key characteristics of a Group 3 PWC.
- Identify at least 2 capabilities of an expandable electronics system that a non-expandable system cannot do.
- Given evaluation findings, rule out a Group 2 PWC base and justify the medical need for a Group 3 PWC base.

Course Level: All Levels – A working knowledge of power mobility devices is recommended.
